PROJECT SUMMARY

| | |
|-------------------------------------|---|
| Site name: | Former Kline Property/Accurate Castings |
| Applicant Name: | The Estate of Neva M. Kline and Accurate Castings, Inc. |
| Site location: | 916 Park LaPorte, IN 6011208 |
| VRP Site No.: | 6011208 |
| Project Manager: | Bill Wieringa |
| Date received: | December 2001 |
| Date completed: | September 2003 |
| Contaminant(s): | RCRA 8 Metals |
| Media addressed: | Surface Soil, Subsurface Soil and Groundwater |
| Cleanup Objectives Achieved: | VRP 1996 Guidance Tier II Residential |
| Deed/Land use restrictions: | NONE |

Project Summary: Accurate Castings provided foundry sand to the Klines to use for fill material on their property during the 1970's. In 1990 and 1991 IDEM conducted field investigations to assess potential impacts from the filling operation. No further action was considered by IDEM. In 2000, the Kline Estate made it known to Accurate Castings that they wished to sell the property and had some concerns about the foundry sand fill. The site entered into the VRP to address the foundry sand used at the site and achieve a Covenant Not To Sue to end the concerns related to the foundry sand. VRP staff split samples of the site soils, sand and groundwater and found nothing above the Tier II Residential Clean Up Goals. VRP considered this project finished in September 2003 upon concluding the review of the Completion Report that was submitted.
